

IMPACT 200

INDUSTRIAL LIFTER FOR THE HEAVY JOBS

MOVE, GRIP, TURN AND TIP ANY ITEM

Impact 200 is designed to do the hard work by lifting, moving and handling items up to 200 kg. It is possible to upgrade the lifter with exchangeable batteries, so it may be operational 24 hours a day.

For the Impact 200 we offer a wide range of electrical tools, for handling e.g. reels and drums with a remote control - that provides many new opportunities in the production lines.

The three mast heights can be combined with leg types in different lengths, including flexible legs with inside widths of 450-610 mm and 650-810 mm (Type 1 & 2). The extensive range of both manual and electric lifting tools is available in various sizes and materials.
